

Environmental protection policy

Schmiedewerk Stooss AG and Schmiedewerk Stooss GmbH is committed to protect the environment in accordance with the actual technical feasibility to avoid environmental impacts.

We want to identify aims for:

- **Knowledge and observance of legal regulations and ordinances**
- **Sensitisation and encouraging staff towards correct environmental conduct in their fields of activity**
- **Taking every action necessary for the avoidance of emissions resulting from accidents**
- **Agreement of active reduction of CO₂ emission and optimisation of energy efficiency**

We want to achieve our aims by:

- **Carrying out an analysis of our processes with regard to environmentally relevant aspects and taking action**
- **Arranging measurements of emissions**
- **Making contact with the various authorities and carrying out required inspections**
- **Sensitising our suppliers to the manufacture of environmentally friendly products**
- **Making a list of our resources and checking their environmental sustainability**

We want to achieve our aims by the following means:

- **Phased training of staff**
- **Obtaining the current editions of norms and laws and checking for action required**
- **Drawing up and adapting internal instructions and check lists**
- **Implementing information sessions**

We want to check our results as follows and learn from them by:

- **Implementing audits and drawing up reports on corrective action reports**
- **Drawing up and evaluating the environmental datas in the Management Review**
